How to Specify 90 degree Corners and Patterns

Example

Defining R - Rectangular shape

Defining L shape

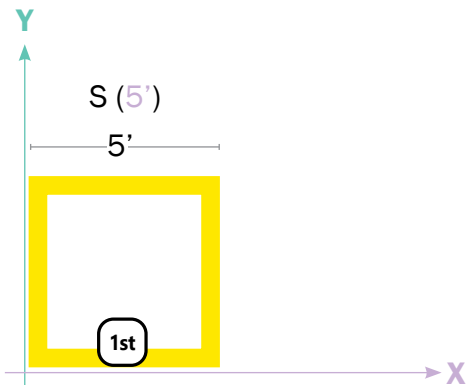

Note: The first number will always define the width, the second - the length.

Defining U shape

Note: The first number will always define the right arm length, the second - the width, and the third - the left arm length.

Defining S - Square shape

Note: The number will define the width. (All sides are the same length).

A large grid of squares, intended for drawing corner patterns. The grid is composed of 30 columns and 30 rows of squares, providing a space for technical drawings.
