The Lighting Distribution Challenge

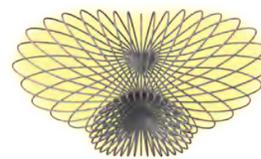

The SurroundLite™ Solution:

3D Light Distribution

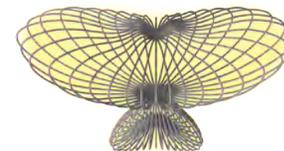

SurroundLite's 3D distribution emits as much light from the ends as from the sides. It provides wide spacing, exceptional uniformity and reduced cave effect, resulting in fewer luminaires needed to light a space.

Top view

Bottom view

Side view

The Lighting Uniformity Challenge

With **SurroundLite**

The SurroundLite™ Solution:

Exceptional Uniformity

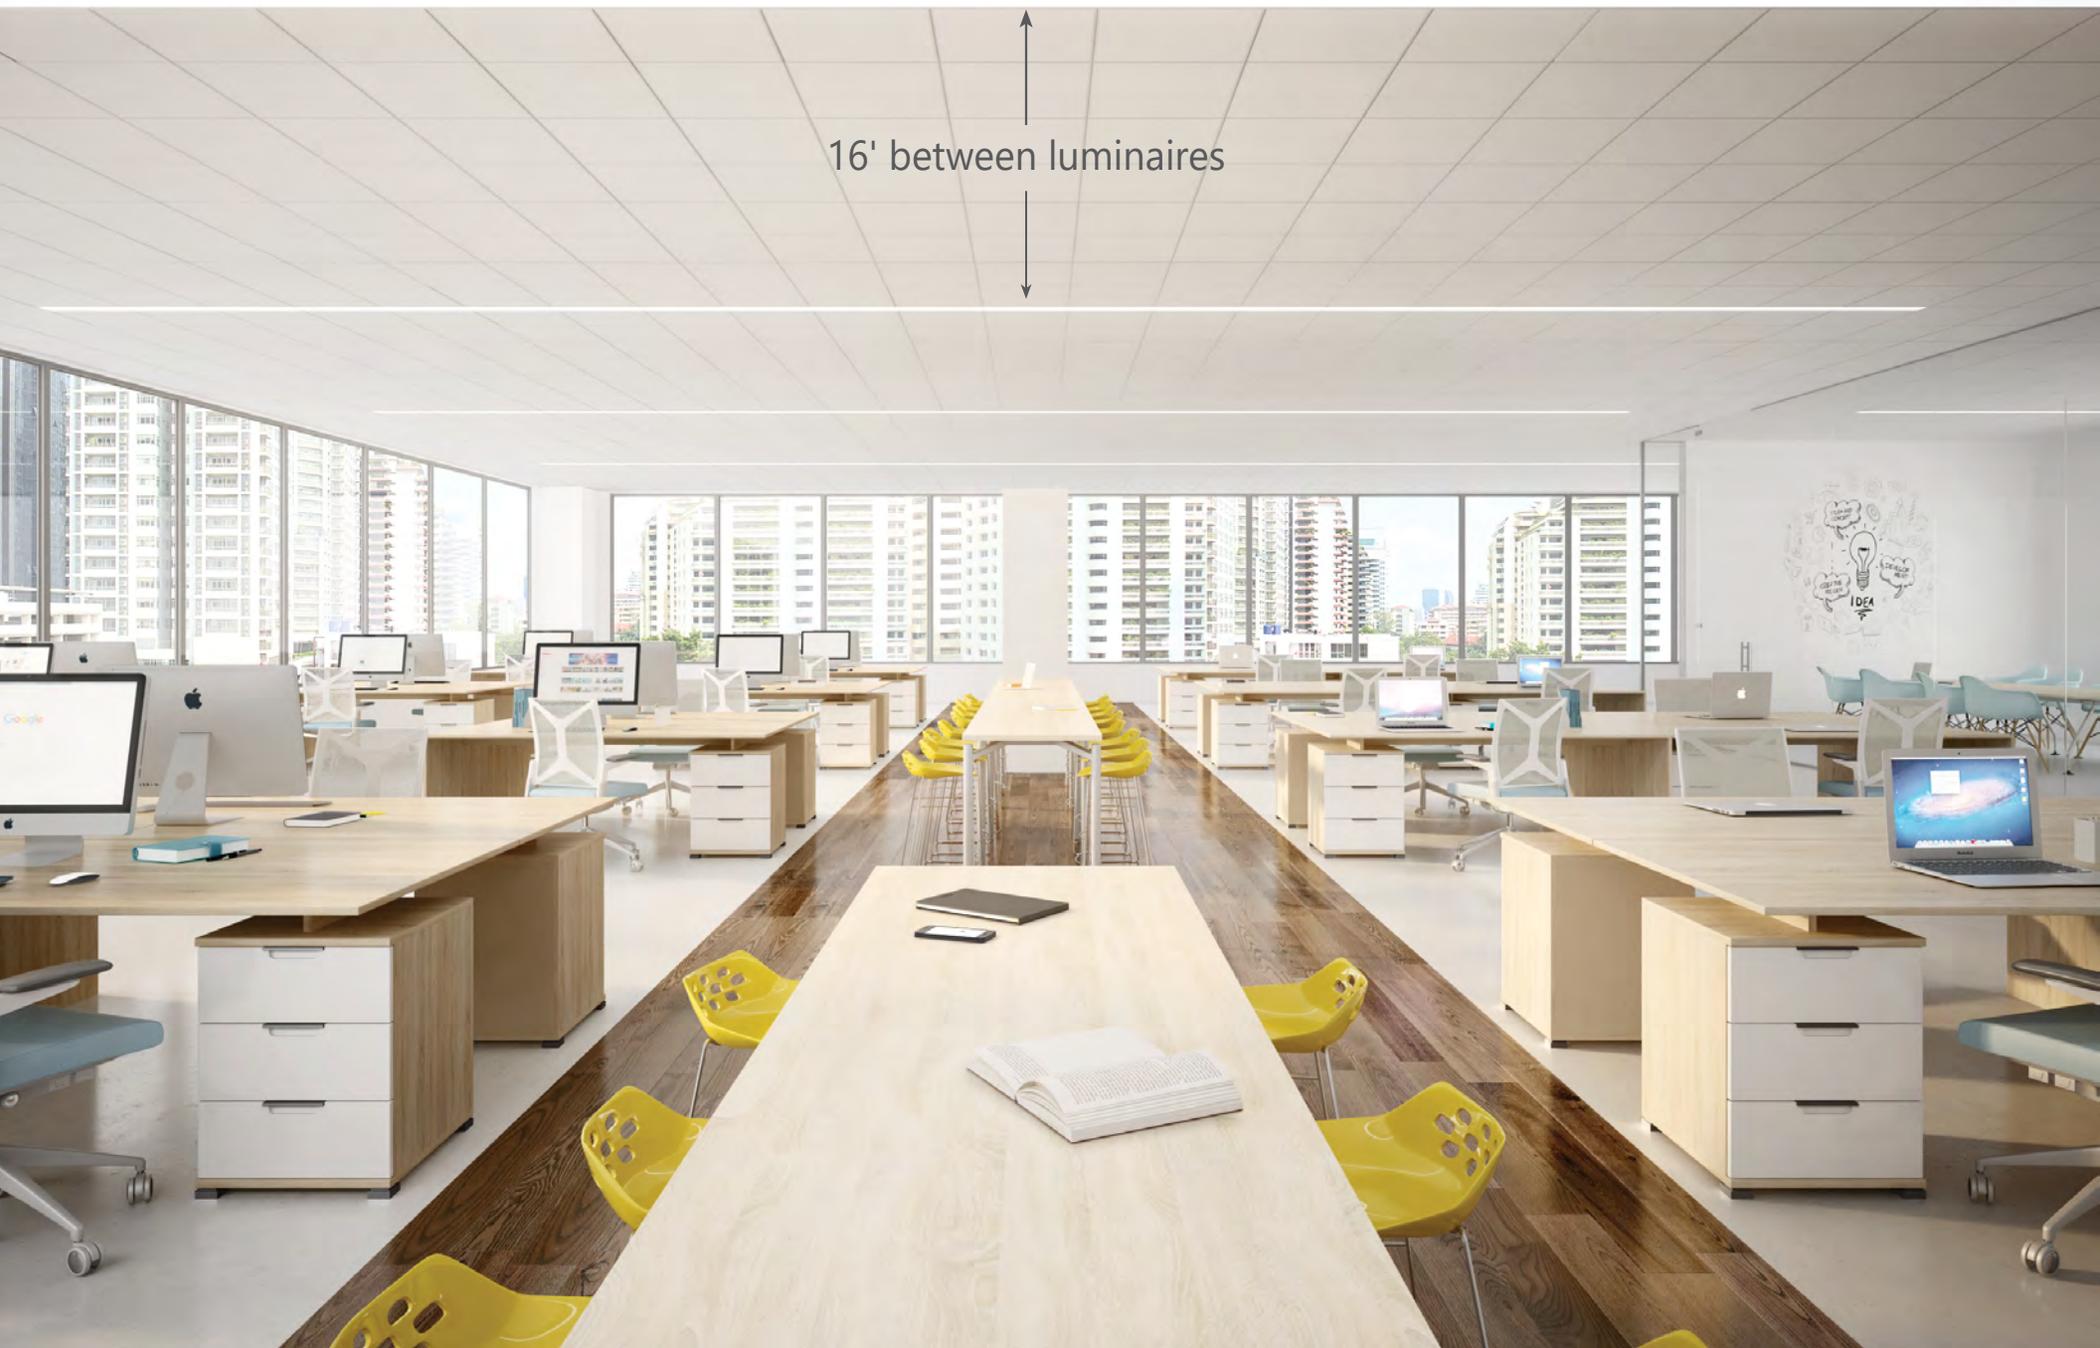

SurroundLite's 3D distribution provides exceptional ceiling uniformity, especially in patterned designs, with products such as Stencil and Sketch Pendant.

Without **SurroundLite**

The Lighting Uniformity Challenge

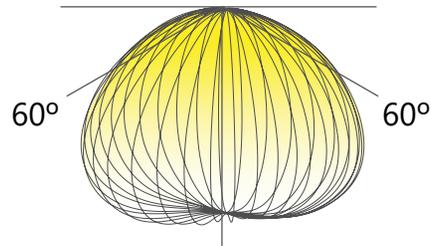

16' between luminaires

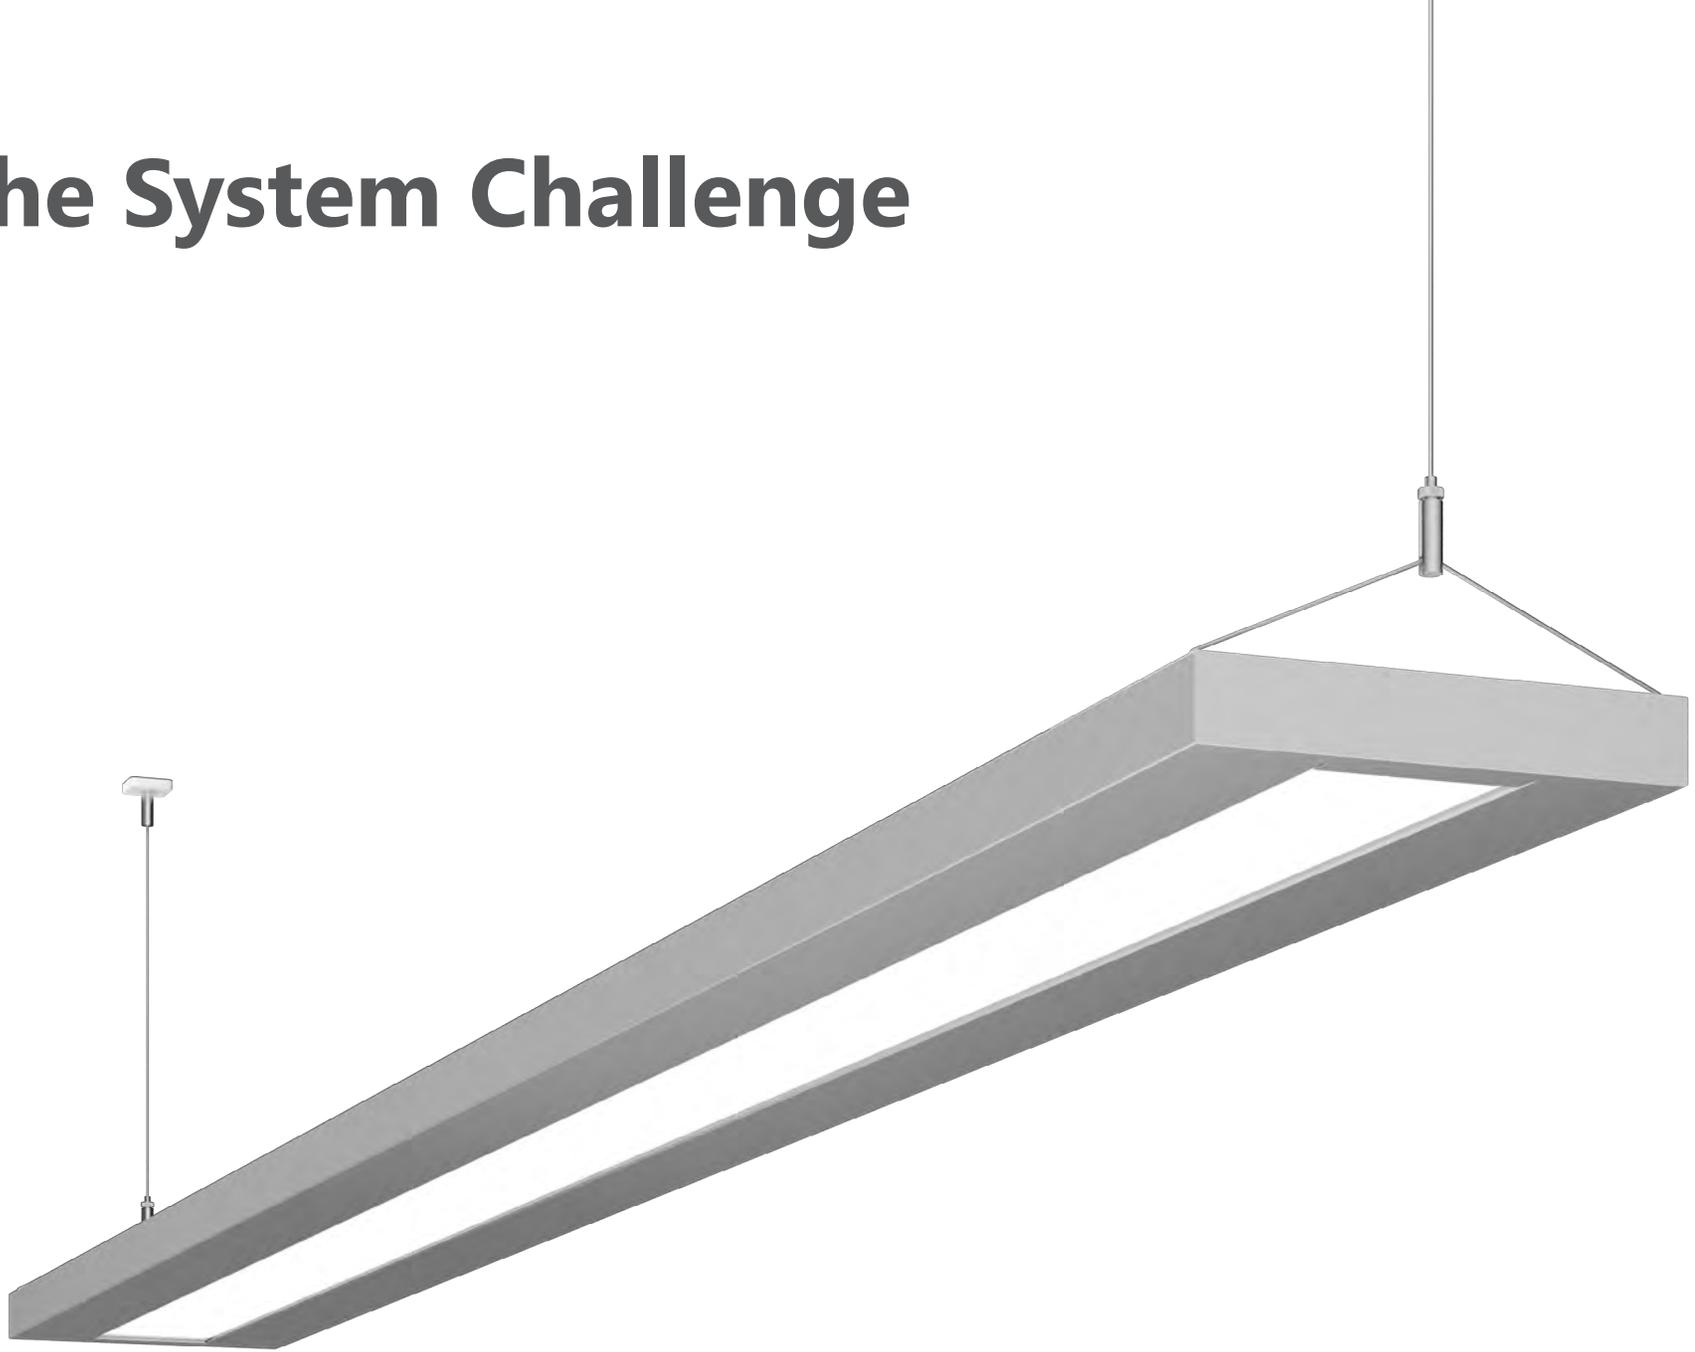

The SurroundLite™ Solution:

Sharp Cutoff

With SurroundLite, the lens is the light, delivering sharp cutoff and reduced contrast to improve visual comfort. Also, luminaires can be more widely spaced so fewer are needed to light the room.

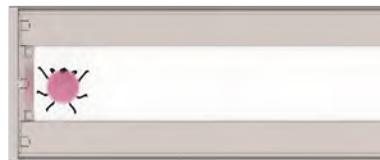

The System Challenge

The SurroundLite™ Solution:

Integrated Design

Every SurroundLite luminaire has an integral control-ready driver and a simple optical, electrical and mechanical connection system, facilitating installation and maintenance.

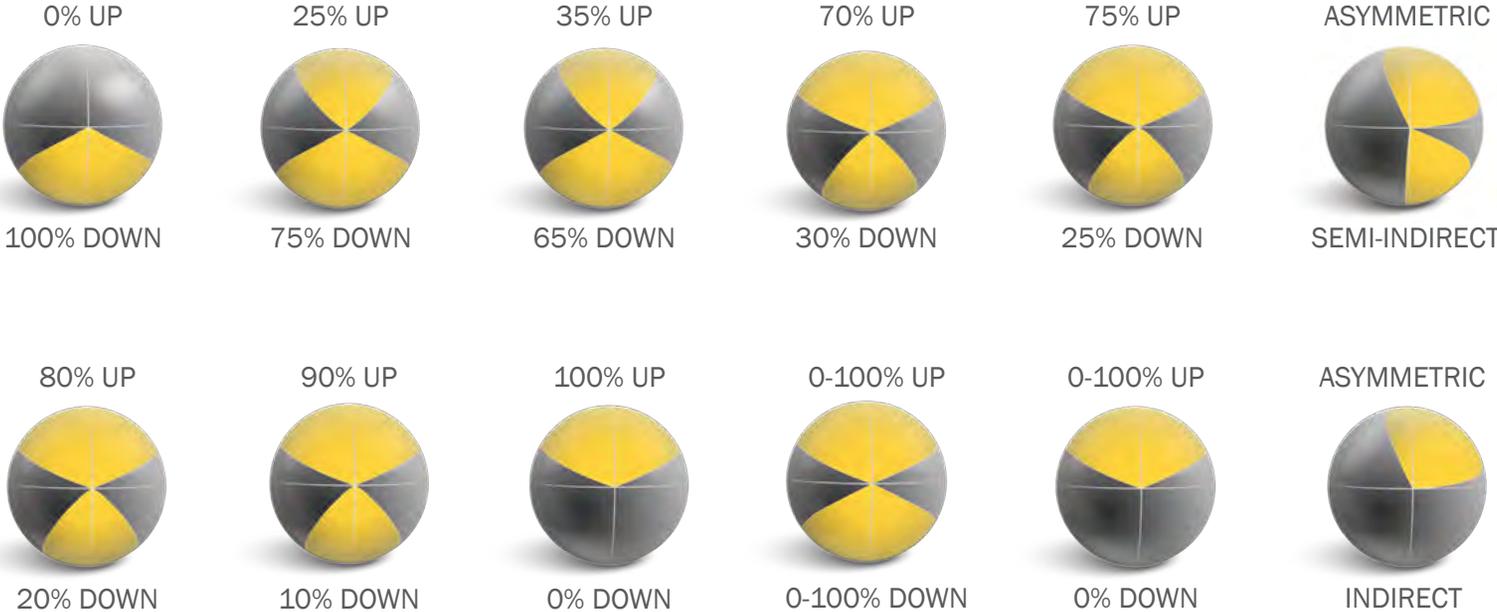

Top view

Bottom view

SurroundLite is a non-imaging optic that effectively masks dirt.

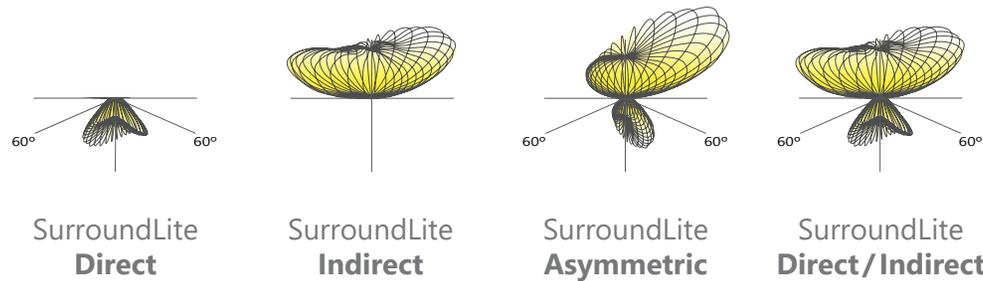

The Application Flexibility Challenge

The SurroundLite™ Solution:

Multiple Distributions

SurroundLite lightguide materials are manipulated at the molecular level to create multiple light distributions:

Form vs. Function

Stencil pushes the boundaries of minimalist design by harnessing the power of SurroundLite® in a miniature optic design that provides the lighting power of a luminaire four times its size.

Sketch Pendant, with its curved SurroundLite lightguide, allows designers to create unique illuminated floating forms that complement the space and provide unprecedented lighting uniformity.

The Luminaire Design Challenge

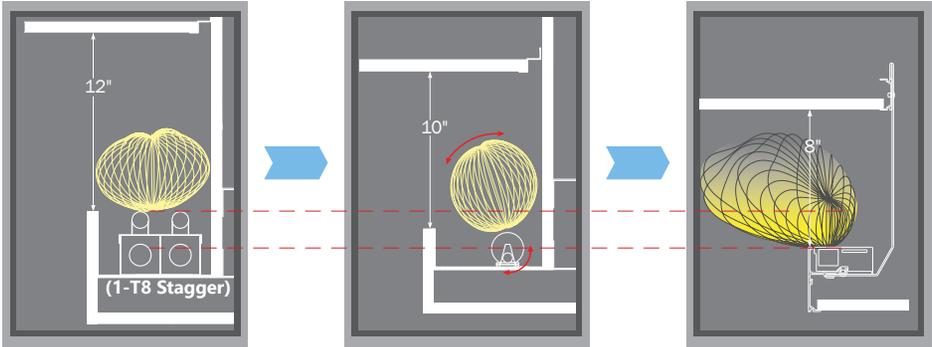

Rethinking Luminaire Design

SurroundLite™ also allows Axis to redefine lighting applications, such as cove lighting. Cove Perfekt Ceiling and Wall set a new standard in cove lighting quality with an easy-to-specify system that eliminates the need for movable optics.

The SurroundLite Evolution in Cove Lighting

Creative Systems

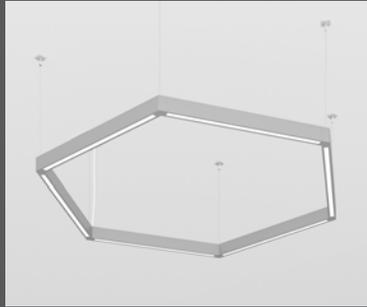

SurroundLite™ Creative Systems

Every model is unique to help you create visual statements that define a space. Creative Systems are more than just beautiful glowing objects for imprinting style. They are also engineered to put light where you need it in the most efficient manner possible. Count on luminaires that provide you with design flexibility, lighting performance and built-in value to enhance an office, an entrance hall, a library and other spaces featuring a modern decor.

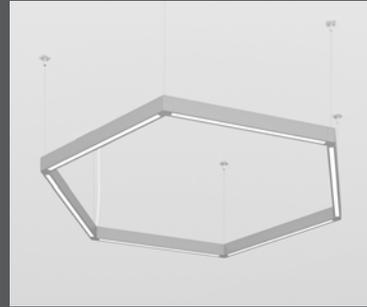

Creative Systems can be used in long lines of light, in short runs to create patterns and along perimeters to expand and brighten up a space.

Right angle mount

Pose®

Ribbons of light featuring SurroundLite™

Combining **superior esthetics, quality performance** and **unparalleled versatility**, Pose offers new opportunities to capture the beauty and benefits of true asymmetric lighting without angled optics or bulky mounting hardware.

Step mount

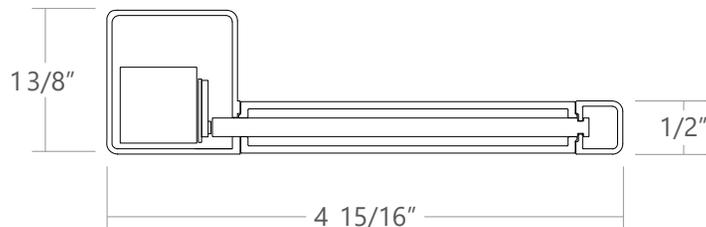

Integral
Mini-driver

One clean look

A form that fits in nicely

Design simplicity and architectural esthetics lay the foundation of Pose[®], a timeless, compact form that lends itself to creating an appealing soft glow.

With its clean lines and lightweight aluminum construction, Pose appears to be floating. Its streamlined look is enhanced by a smooth, pixilation-free uniform lens.

Pose® generates ribbons of appealing light that are both visually comfortable and visually stunning.

Two optics + Two sides

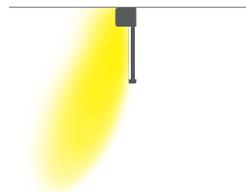

Lighting options you can work with

Go for one or two illuminated sides, and choose between two optics – true asymmetric distribution or a soft Lambertian glow – for a total of eight combinations to choose from (see page 14).

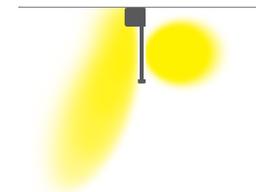

The asymmetric light source is a patented SurroundLite™ optic delivering superior performance and balanced luminance. The Lambertian optic produces a soft luminous effect that mitigates contrast.

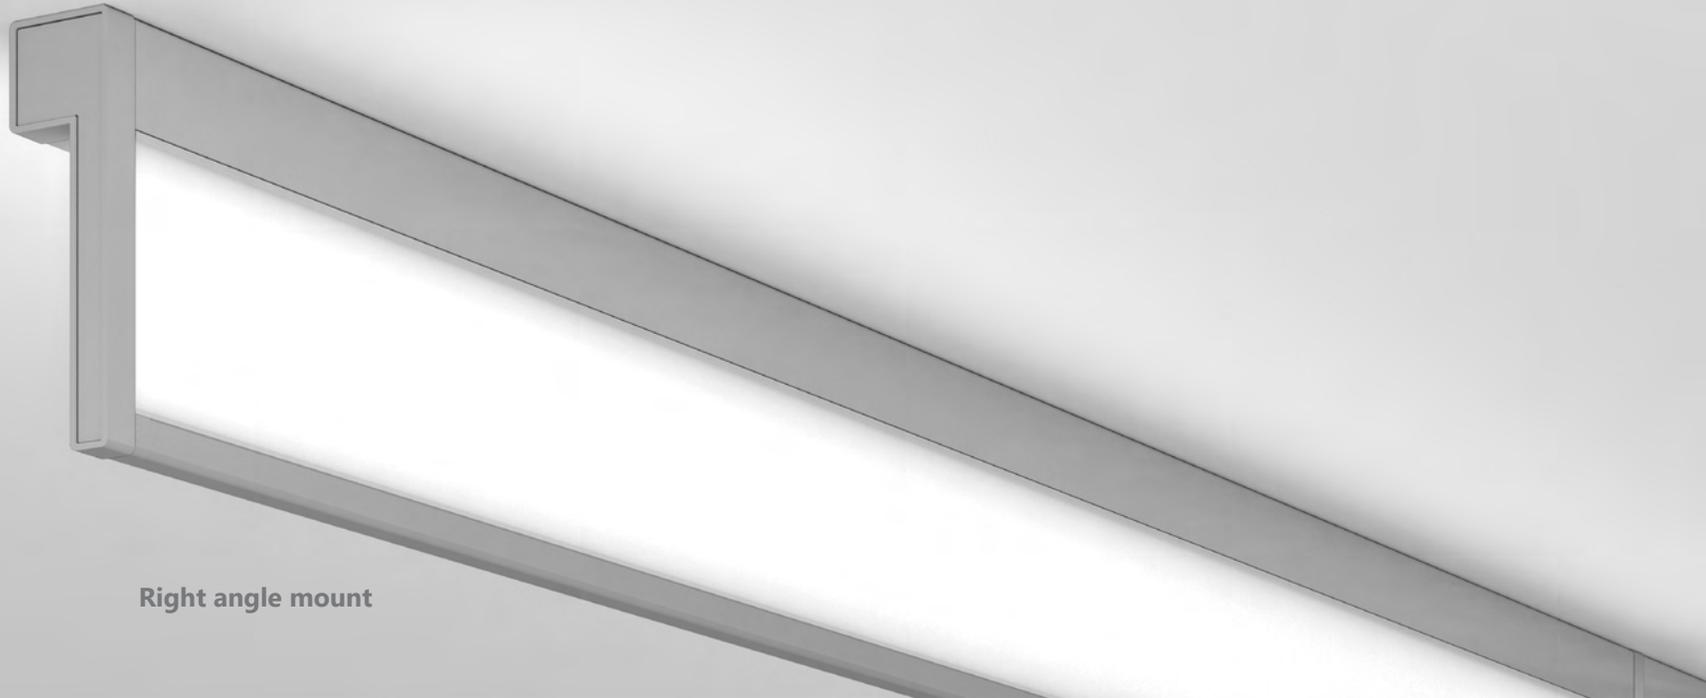

One illuminated side

Two illuminated sides

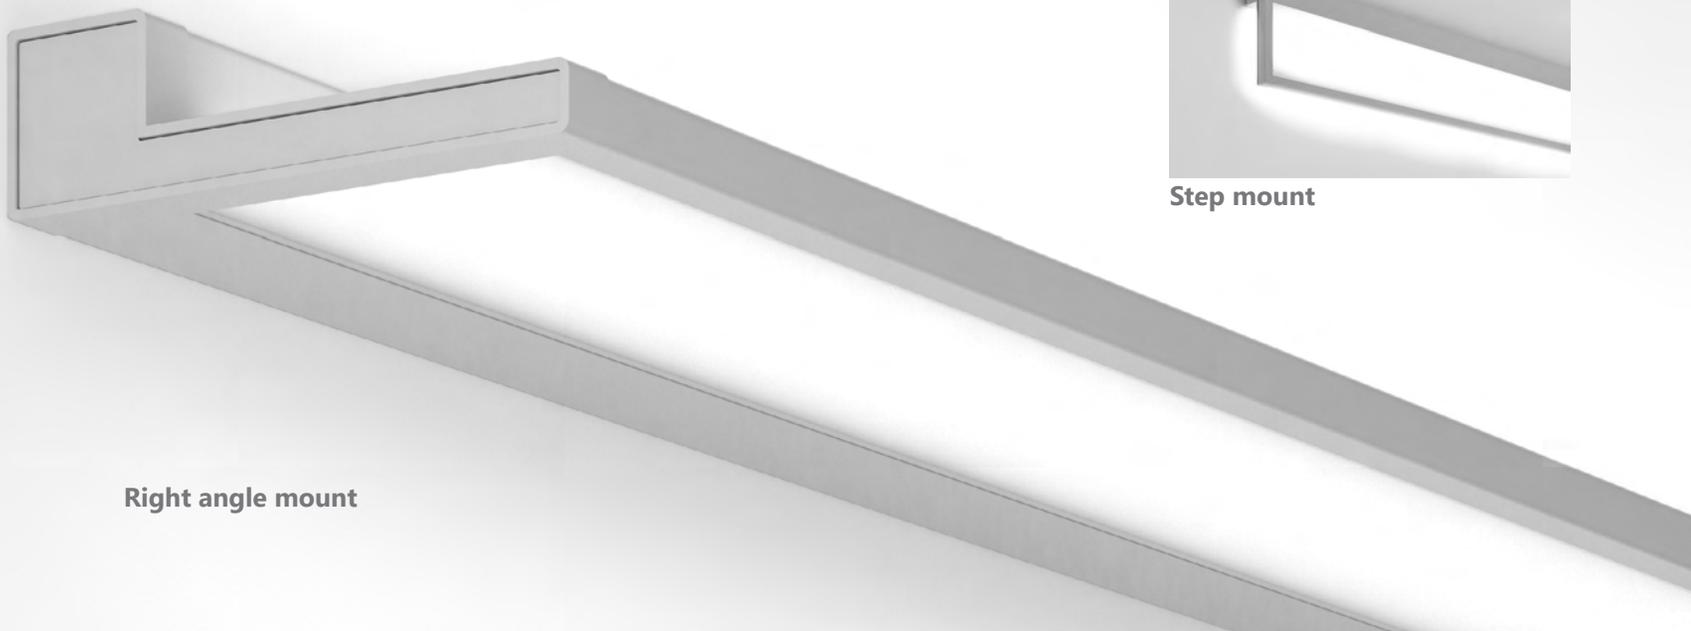

Surface

Right angle mount

Wall

Right angle mount

Step mount

Two mounting planes

Endless design possibilities

From the simplicity afforded by two optics, two illuminated sides and three mounting planes come unlimited lighting design options...

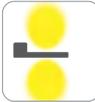

On any of its three mounting planes, Pose® can be installed with the driver compartment pointing up or down, horizontally or vertically. In addition to continuous runs, Pose can be used in patterns and corners, as well as in coves.

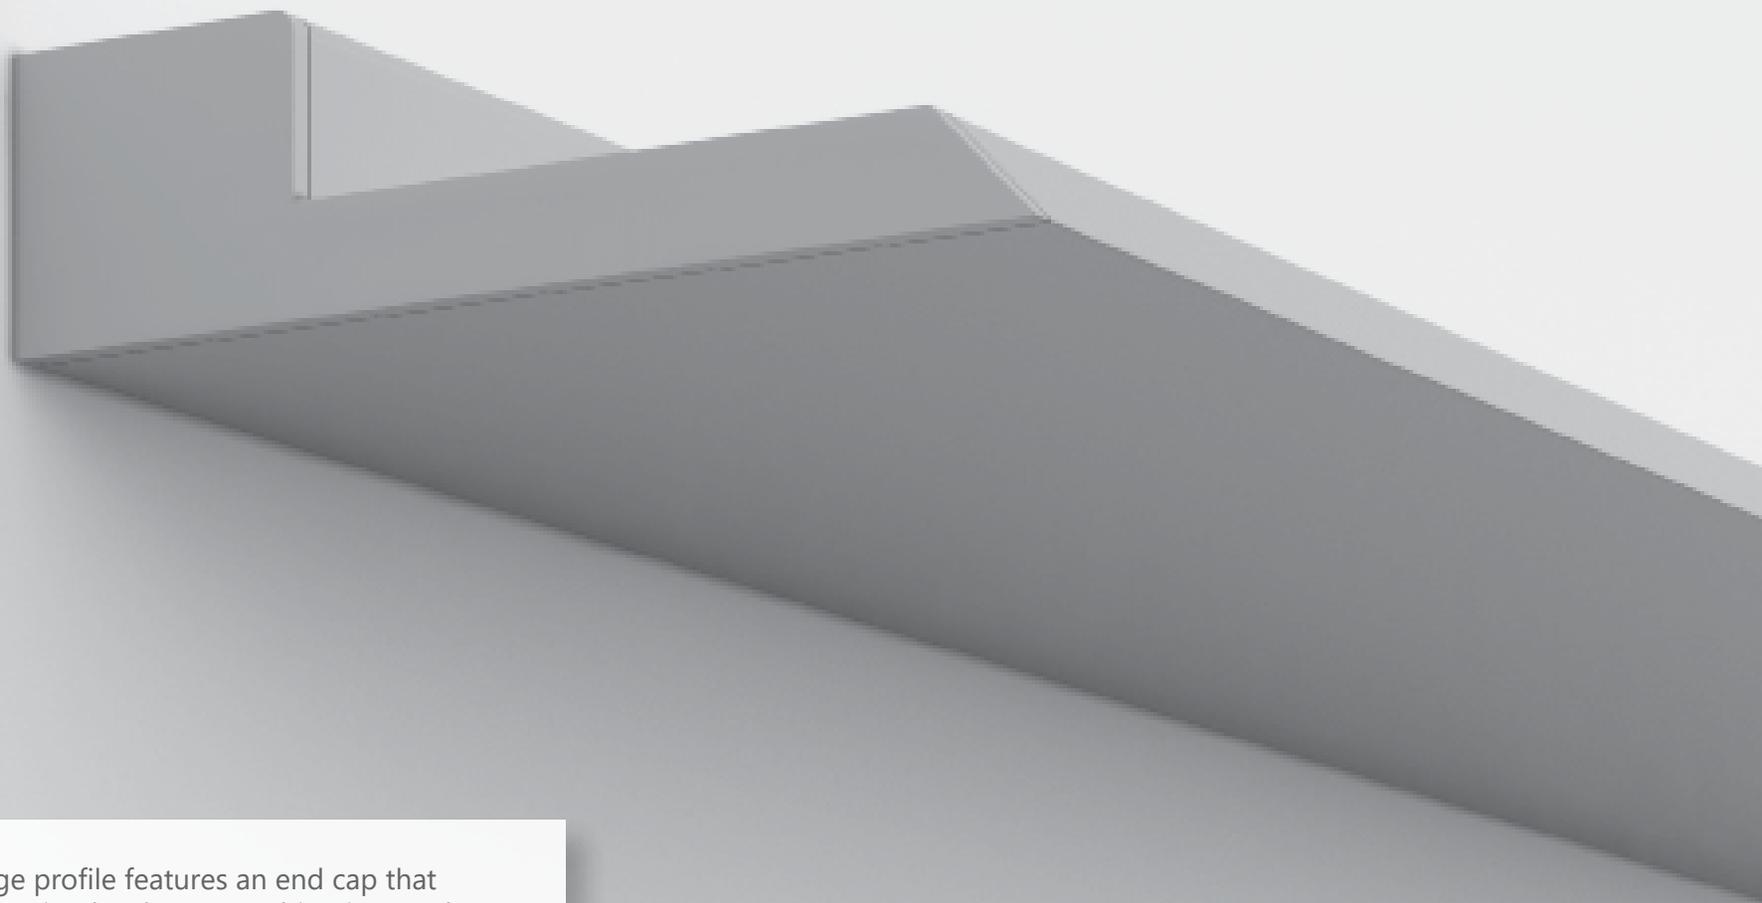

A wide range of distributions

With a maximum output of 1000 lm/ft and a choice of asymmetric SurroundLite™ and Lambertian distribution combinations, Pose® is capable of delivering the light levels needed for the most demanding applications.

 Pose Surface & Wall		asymmetric	LUMENS %		lambertian	LUMENS %		asymmetric	LUMENS %		lambertian	LUMENS %
		asymmetric	50%			50%			40%			60%

Wall mount distributions shown here also apply to ceiling mount applications (rotate 90°).

 Pose Knife Edge		asymmetric	LUMENS %
			100%

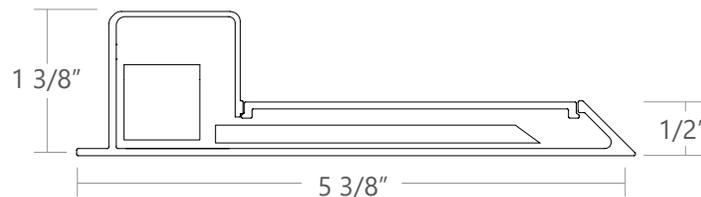

The knife-edge profile features an end cap that hides the mounting hardware, resulting in seamless architectural integration.

Pose® Knife Edge

Ideal for cove-less coves

This version of Pose features the smallest knife-edge profile in the lighting industry. Made of a single extrusion, Pose Knife Edge is available with a solid, non-luminous bottom and asymmetric upright optic. Continuous runs and corner patterns also available.

Pose Knife Edge lets you add cove details in a space without the hassle and cost of building coves. Use the luminaire as a shallow ledge or hidden indirect light source to create your own cove-less cove solution.

Stencil Pendant Direct / Indirect

New minimalist lighting options

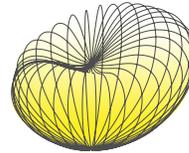

Introducing a new addition to the Stencil family that extends the possibilities of pendant lighting with a visually comfortable, low-energy alternative. With direct and indirect lighting in every segment, Stencil Pendant D/I maintains lighting uniformity in continuous lines of light.

- ✓ Same look and size as Stencil Pendant, creating opportunities for coordinated lighting design.
- ✓ Cost-effective linear lighting solution
- ✓ Wide indirect lighting powered by Mini SurroundLite
- ✓ Choice of optics: lens, louver and MikroLite™
- ✓ Independent lighting control of direct and indirect components
- ✓ Remote driver allows for short luminaire lengths that would not be possible with larger integral drivers

Stencil Pendant D/l shown

Mini SurroundLite™

The lighting power of a fixture four times its size

An exclusive Axis innovation, SurroundLite delivers indirect lighting with a wide 3D distribution and balanced brightness.

In addition to superior visual comfort, SurroundLite provides more design freedom. Its high-performance indirect lighting enables the use of fewer Stencil Pendant and Pendant D/I segments. Also, linear applications feature more widely spaced lines of light.

Stencil Pendant D/I, Pendant & Surface

The entire Stencil family is suited to linear lighting applications. While Stencil Surface integrates well with the grid and Stencil Pendant is more cost-effective for creating forms and patterns, Stencil Pendant D/I is recommended for long lines of continuous light.

	lm/ft	Drivers
Pendant Direct/Indirect	Direct: Up to 600 lm/ft Indirect: 1000 lm/ft	Remote driver - Lutron, DALI, etc.

Architectural Systems

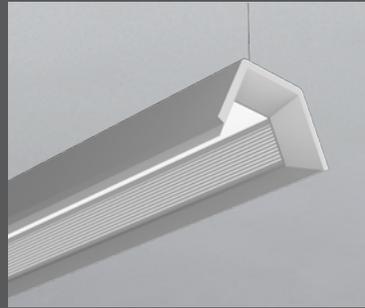

SurroundLite™ Architectural Systems

Striking the perfect balance between form and function, the Architectural Systems family is the ultimate design toolbox for creating beautiful quality lighting concepts for a wide variety of applications.

Beyond providing esthetic appeal, these lighting instruments bring together high-output illumination, excellent glare control, wide spacing opportunities, integrated controls options and installation flexibility. Everything you would expect and more.

Zen Square and
Zen Square Form

Zen

Slim

Cubic

Zen, Zen Square and Zen Square Forms

The SurroundLite™ story

Zen and Zen Square pendants incorporate patented SurroundLite technology developed by Axis. The result is a richer visual experience with additional light distribution that opens up a space and pleases the eye.

High-Performance Optics

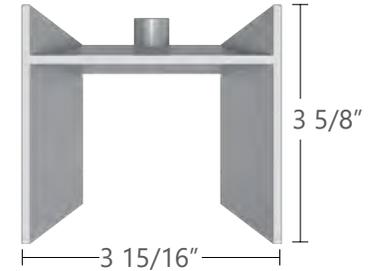

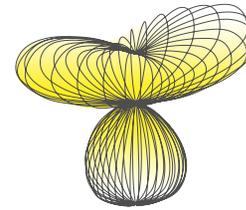

SurroundLite produces a visually appealing non-Lambertian 3D spherical batwing light distribution.

- ✓ Uniformly diffuse lighting similar to daylight.
- ✓ Wide planes of light in all directions: ceiling, corners, walls.
- ✓ Reduced contrast on the ceiling, improving visual comfort.
- ✓ Wide spacing results in fewer luminaires needed to light a space.

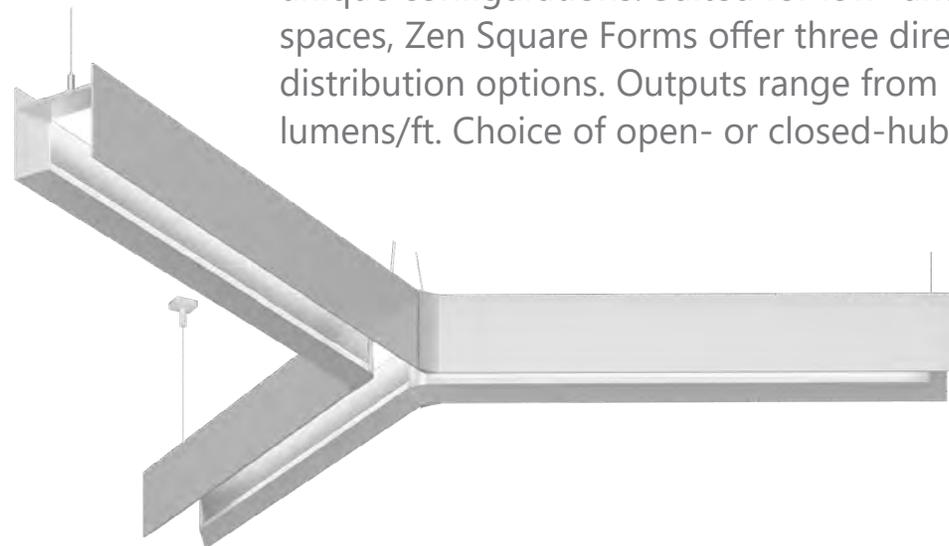

Houston,
we have a
problem

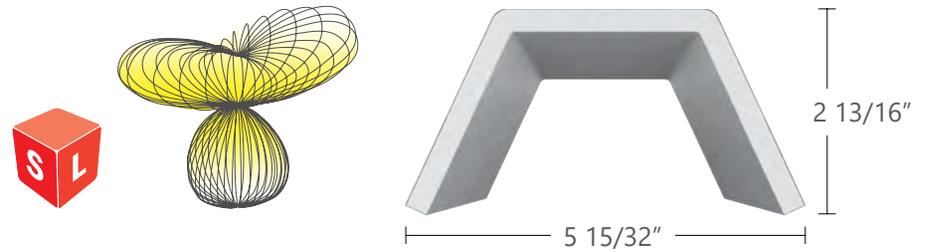

Zen Square Forms Powerful, elegant pendant alternatives

Take pendant lighting concepts to new heights with the graceful presence of Zen Square Forms. The available Y- and X-shaped luminaires generate significant visual interest against the ceiling line while creating opportunities for appealing neighborhoods of light, rhythmic layouts and unique configurations. Suited for low- and high ceiling spaces, Zen Square Forms offer three direct-indirect lighting distribution options. Outputs range from 500 to 1350 lumens/ft. Choice of open- or closed-hub designs.

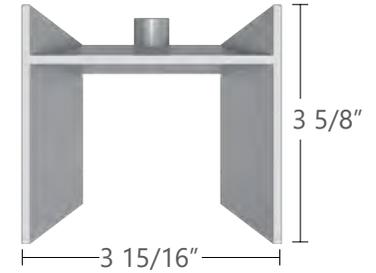

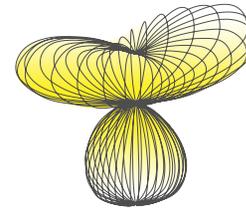

Zen

A family of sleek luminaires with superior lighting power

These patent-pending inverted-U forms provide soft, comfortable lighting. They emit more downward luminance from the top than from the sides. Pendant versions use SurroundLite™ optics to open up the space by delivering ample, glare-free downlighting and reflected light throughout.

Cove Systems

SurroundLite™ Cove Systems

Few luminaires have been more in need of an upgrade than cove lights, long stifled by complicated details and inconsistent, time-consuming aiming.

Armstrong Ceiling Systems and Axis saw an opportunity to reduce clutter and simplify design. So we joined forces to codevelop the best possible cove lighting solution from the ground up.

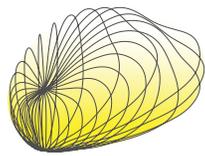

The result: A foolproof, pre-engineered cove system and an aim-free, high-performance cove light that set the new standard for cove lighting.

Cove Perfekt The new standard for cove lighting

Cove Perfekt Ceiling

Cove Perfekt Wall

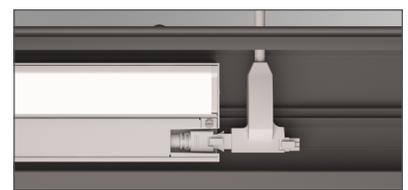

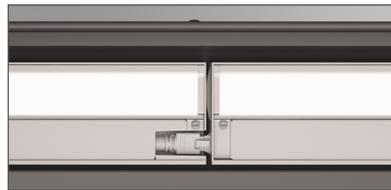

Cove Perfekt

Pre-engineered quality cove lighting system

In partnership with Armstrong Ceiling Systems, Cove Perfekt takes the guesswork out of cove lighting. Design smaller coves, eliminate hot spots, do away with aiming, improve the overall cove light quality with the power of SurroundLite™ and save energy like never before with this simple-to-specify system.

- ✓ Up to twice the efficiency of other cove products.
- ✓ Simple, easy-to-specify system.
- ✓ Foolproof mounting. Aim-free lighting.
- ✓ Available with color tuning options.

Telescoping Cable for Easy Installation

T - End Power Feed

Cove Perfekt & Axiom® Cove

Up to 90% Less Labor to Install Coves

Cove Perfekt was designed in sync with Axiom®, Armstrong's new, easy-to-install cove system. Together, they form the new standard for cove lighting.

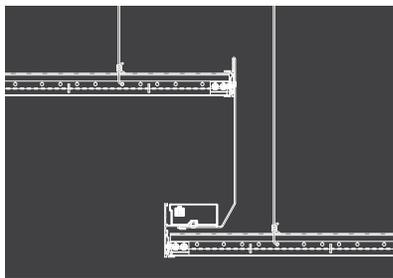

- ✓ Easy onsite trade coordination
- ✓ Luminaire position at very front of cove to maximize efficiency
- ✓ Optional air return slots
- ✓ No need for complex cove details
- ✓ Keyed system ensures proper mounting of luminaires

About Axis Lighting

Founded in 1991 and still family owned and managed, Axis is an important source for architectural lighting across North America and around the globe.

Over the last decade, the company has exhibited remarkable growth thanks to its commitment to Design Flexibility, Optimal Energy Efficiency and Responsive Customer Care. That leadership effort now extends to developing Innovative Lighting Technologies, such as SurroundLite™, on an ongoing basis.

On the strength of a broad and expanding product line, Axis has successfully completed lighting projects for high-profile clients including Apple, Chrysler, The Empire State Building, Google, Hyundai, Time Warner and McGill University, among many others.

Axis has the drive and the expertise to meet your needs and provide architectural lighting... your way.

We reserve the right to change specifications without notice.
Please consult our website for the most current technical information
and to locate your nearest Axis representative.
